

Dear Rising Third Grade Parents,

Summer 2019

It is hard to believe that the school year is almost over and in a few short months your child will move to third grade. Summer vacation is fast-approaching and we know that you are all looking forward to some time for rest, rejuvenation and family. While we are strong advocates for much-needed downtime, research shows that up to one month of learning loss can take place during the summer months (Cooper et al, 2003). To preserve your academic progress, we recommend that you create a daily routine this summer based on the activities and information outlined in this package.

Completing the required reading and academic exercises will ensure confidence and preparation upon return to school in August. We hope that parents and children will work together to balance academic practice with other interests in order to gain maximum benefit of the activities.

### **Reading**

Students are required to read a minimum of **two** chapter books this summer. These books should include a chosen fiction book and a book from the Who Was series. The selected books should be in the reading range noted on the final Accelerated Reader report of the school year. The AR level and quiz number of books can be looked up on [arbookfind.com](http://arbookfind.com). **The AR tests for these books should be taken during the first two weeks of school. In addition, students must complete an assignment for each book read.**

### **Math**

All students are expected to have mastered addition and subtraction facts (without using fingers) from 0-20 before entering 3rd grade. If these facts are not truly mastered, the student will be at a disadvantage starting 3rd grade. Students should also know multiplication facts for 0, 1, 2, 3, 4, 5, and 10. There are numerous apps and websites to assist with practicing multiplication such as [multiplication.com](http://multiplication.com), [coolmath.com](http://coolmath.com), and [mathisfun.com](http://mathisfun.com). Students will start taking 3 minute, 50 question multiplication drills at the beginning of the year. Attached to this packet are sample drills for the facts above.

**Summer assignments are due to your new third grade teacher by Friday, August 23, 2019.** We look forward to seeing you in August!

Sincerely,  
Third Grade Teachers

**Summer Reading List - students must read two books over the summer.** The assignments to complete for each book are listed after book selections.

Students must read one nonfiction book from the *Who Was* series (3.8-5.0). For this book, students should answer the following questions.

1. Write a 7-10 sentence summary of what you learned about this person while reading this book.
2. What is the most interesting fact you learned about this person? Answer in 3-5 detailed sentences.
3. If you could meet this person, what **three** questions would you ask him/her? Answer in 3-5 sentences.

Students must choose one fiction chapter book of their choice and complete the following:

1. Write a 7-10 sentence summary describing the most important events in the book.
2. Write 3-5 detailed sentences describing your favorite part of the book. Why is this part your favorite?  
Draw a picture that shows this part.
3. Which character in the book are you are most like and why? Use specific details from the book to answer in 3-5 sentences.

**Suggested titles for third grade summer reading. Any book on the student's end-of-year AR reading level is acceptable.**
